

Amendments to the Drawings

A replacement drawing page showing amended figures 3a-c is attached hereto, along with a second copy of the replacement drawing page showing the specific amendments made.

REMARKS

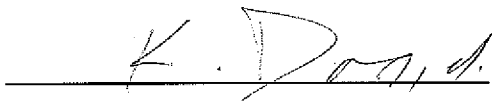

Applicant wishes to thank the Examiner for reviewing the present application.

The foregoing amendments are submitted in response to the Notice to File Corrected Application Papers dated September 14, 2010. By way of the foregoing amendments:

- paragraph 46 of the specification has been amended to refer to FIG. 3a, to conform with the drawings; and
- The respective elements of original FIG. 3 have been designated as FIGs. 3a, 3b and 3c, so as to conform with the brief description of the drawings at paragraph 29 of the original specification.

It is believed that the above noted amendments fully address the objections raised in the Notice to File Corrected Application Papers dated September 14, 2010. Furthermore, it is believed that the above noted amendments do not alter the scope of the claims, or give rise to any requirement for further consideration on the merits. Accordingly, entry of the above-noted amendments, and issuance of a patent is believed to be proper, and such action is requested.

Respectfully submitted,

Kent Daniels
